EXPERIENCE

MoveHQ, Reynoldsburg, OH — *Mobile (Android & iOS) Developer*

November 2017 - PRESENT: ****This is a full-time position, not an internship.**

* Design and implement new features for MoveHQ's core mobile application (and all its customized derivatives) on both iOS and Android platforms.

* Estimate and quote project features and customized implementations for our customers

* Bug fixes and code maintenance in general for all our mobile apps

* Perform code reviews for peers and promote their updates/fixes to other teams for quality analysis and verification using Agile procedures

* Manage lifecycle and major app releases for several of our team's Android and iOS core applications, both through the app stores and enterprise websites

* Generate documentation about our development processes for the team and new hires

* Technologies used: Android Studio, Xcode, SQLite, Java, Objective-C, Swift, Kotlin, C/C++, C#, REST, XML, JSON, HTML, Google APIs, CocoaPods, Fabric.io, Git, GitLab, Appium, automated testing platforms, and general open-source 3rd-party libraries and tools

* **References:** Matthew Hamilton (Supervisor: cell: 330-933-2466 | email: matthew.hamilton@movehq.com) and Xavier Shelton (Lead: cell: 614-900-8616)
